Harvest Operators record information with a simple touch on the screen. Data is collected and routed straight to the HarvestPay system. The program manages the information and provides accurate and reliable reports including worker productivity and hourly wage. Your records are accessible through your HarvestPay account. Information can be exported to your chosen payroll processing program or even e-mailed to your payroll company.

HarvestPay ensures that you log precise work hours without the added paperwork of time sheets or punch cards. Here are some other benefits of working within this system:

- Save time with easy-to-access harvesting crew information
 - Eliminate hassle of manual data entry
 - Generate clear and convenient payroll reports
 - Update crop estimates per block during harvesting
 - Do away with having to collect or turn in handwritten work sheets
 - View and edit payroll instantly from your office
 - Accurately document hourly wages in compliance with federal labor requirements
-
- Daily work receipts ensure worker confidence in accuracy of HarvestPay system
 - Reduce risk of unregistered workers
 - Add value to harvesting services by promoting accountability
 - Increase accuracy and value of HarvestMap information

"We have a value-added component of our service through yield mapping."
